Mixed rank: rank of the equally weighted semantic, lexical and terminology mean ranks. Parentheses show the mixed mean rank; lower ranks are better.

Within each family, metrics have equal weight; terminology first balances all / external / LLM-enriched groups equally. Tied metric scores receive average ranks.

Cells: median across models of per-model partner-direction means. Colors encode metric ranks across eligible languages, not models.

Languages ranked; partner sets may differ. Incomplete coverage is excluded, never scored zero. All-NA metrics omitted. Descriptive chosen weights, not a significance or human-validity claim.
