Metric Correlations | Chemical Patents | original_glm | Few Shot

Pearson | 7 model scores per pair | 11-22 common directions

Spearman | 7 model scores per pair | 11-22 common directions

Blocks: general metrics | all terms | externally verified | LLM-enriched (refined). Off-diagonal blocks compare metrics across term groups.
Cells: unchanged coefficients to three decimals. Colors use a shared nonlinear scale to expand differences near +/-1; colorbar ticks are actual correlations.
Each pair uses common directions within each dataset across all models, both prompts and all three term groups for terminology metrics.
Pairwise supports may differ; NA = unavailable or constant. All-NA success-rate metrics are omitted. Descriptive model-level correlations, not per-translation correlations or significance tests.
