Mixed rank: rank of the equally weighted semantic, lexical and terminology mean ranks. Parentheses show the mixed mean rank; lower ranks are better.

Within each family, metrics have equal weight; terminology first balances all / external / LLM-enriched groups equally. Tied metric scores receive average ranks.

Metric cells: maximum native score across shared language directions, NOT individual translations. Colors use within-metric model ranks.

Selected current models; metric-specific shared directions, not proven identical rows. All-NA metrics omitted. Descriptive chosen weights, not a significance or human-validity claim.
