GPT-6 Luna · Muse Glimmer 30B · Qwen3.8 27B · Zero Shot

One dot = one model, not an individual translation. Axes retain each metric's native units; no pooled correlation across datasets or directions.
Luna LLM-enriched terminology; common directions for every selected model and both prompts. Equal direction weights within each model.
Pair-specific supports can differ. Row counts do not prove row identity. Descriptive associations, not significance tests.
